- Strom gibt es nur mit 110 Volt.

## Teil III

3.1. four / high / who / moved / speak / their / in

3.2. Es gibt sicher noch mehr Möglichkeiten ...

a)

That is a difficult question. I think I am special because I am very good at sports. I play football in club and I have to go to the training every day. I also play football in the Saxony league at the weekend. Other young people enjoy going out, but I am always tired after a 90-minute football match. Then there is the trip back home. There is not much time left in the evening and on Sunday I start preparing for school. I would like to be good at sports and at school.

b)

My favourite season is summer. There are many reasons for that. There is more sun and light in the summer. I hate autumn and winter for the grey sky and short days. You have to stay inside most of the time. In the summer it is warm, you can stay outside, meet friends and play in the park. Also, you can go swimming in lakes or go sunbathing or even swimming in the sea. You can play volleyball on the beach.

c)

Sport is interesting for me because I can practice it myself and also because I can see professional people doing it. I love watching a match on TV and live in a stadium. That is a fantastic atmosphere. I like team sports. People have to play together to make a goal. That is more fun. My most favourite sport is football. It is very easy and you only need a ball. If you want to be more professional you need special boots and a shirt and trousers in your team colours.
